Organization and spontaneous mass behavior. Managing Massive Behavior. The problem of rumors in the organization, rumor management.

Preliminary control. current control. Final control.

The content of independent work of students

- 1. Work with the recommended literature supporting theoretical and practical material, preparation of abstracts.
- 2. Working with Internet resources: monitoringsituational factors influencing group organizational behavior.

3. The content of independent work: preparation of presentations on problematic issues in the organization.

Current control is carried out in the following forms.

Report: the topic of the report is selected from the list of suggested topics. The report is an oral communication of 10-15 minutes, accompanied by a presentation and handouts for listeners, which, in addition to the basic concepts, must include a list of sources used. The handout becomes part of the student's teaching material on the specified topic.

The form of current control is a report and a test.

5. Educational technologies

The methodology for teaching the discipline "Modern Organizational Management Structures" and the implementation of a competency-based approach in the presentation and perception of the material provides for the use of the following active and interactive forms of conducting classroom classes in combination with extracurricular work in order to form and develop the professional skills of students:

- discussions on problematic issues (based on the results of independent work);
- discussion of reports on the discipline.

6. Evaluation tools for current monitoring of progress, intermediate certification based on the results of mastering the discipline and educational and methodological support for students' independent work.

In the learning process, the following assessment forms of independent work of students, assessment tools for monitoring progress and intermediate assessments are used:

Forms of current control: discussions, discussions of business economic situations, preparation of reports, tests.

6.1. Fund of assessment tools for conducting intermediate certification of students in the discipline (module).

6.1.1. A list of competencies indicating the stages of their formation in the process of mastering the educational program.

As a result of mastering the discipline (module), the following competencies are formed:

Competency code	As a result of mastering the educational program, the student must have
PC-1	Able to regulate the processes of organizational units or develop administrative regulations for organizational units

In the process of mastering the educational program, these competencies, including their individual components, are formed in stages during the development of disciplines (modules), practices by students in accordance with the curriculum and calendar schedule of the educational process.

6.1.2. Description of indicators and criteria for assessing competencies formed on the basis of the results of mastering the discipline (module), description of assessment scales.

An indicator of competency assessment at various stages of their formation is the achievement by students of the planned learning outcomes in the discipline (module).

PC -1Able to regulate the processes of organizational units or develop administrative regulations for organizational units

IPK-1.1.Knows the theory of process management; principles of process classification; methods of structuring processes; basics of operational management; methods of collecting information (observations, data recording, timing, photography of the working day, interview and questionnaire techniques, analysis of documents and reporting information, studying feedback from stakeholders); methods of designing functional role models; methods for classifying information about the process and the environment of the process; principles and rules for working with regulatory and methodological documentation; requirements for the development of process regulations; fundamentals of economics, cost accounting and performance evaluation; process modeling notations; methods to improve the efficiency of processes and administrative regulations; the basics of implementing changes; basics of business process modeling; methodological documents and rules for monitoring the compliance of processes or administrative regulations; methods for assessing the reliability of the information collected; methods for analyzing the collected information; rules for preparing reports, conclusions on the results of control; methods for evaluating the effectiveness of processes or administrative procedures.

The trainer has a successful and systematic application of the skills to determine the inputs and outputs of the process of a division of an organization or the beginning and result of the implementation of the administrative regulations of a division of an organization.			

Form of intermediate attestation: test.

Intermediate attestation of students in the form of a test is carried out based on the results of the implementation of all types of educational work provided for by the curriculum for a given discipline (module), while taking into account the results of current monitoring of progress during the semester. The assessment of the degree of achievement by students of the planned learning outcomes in the discipline (module) is carried out by the teacher conducting classes in the discipline (module) by the method of expert assessment. Based on the results of the intermediate certification for the discipline (module), the grade "passed" or "failed" is given.

Evaluation scale	Description
Passed	All types of educational work provided for by the curriculum were completed. The student demonstrates the correspondence of knowledge, skills and

	abilities given in the tables of indicators, operates with the acquired knowledge, skills, skills, applies them in situations of increased complexity. In this case, minor errors, inaccuracies, difficulties in analytical operations, transferring knowledge and skills to new, non-standard situations can be made.
Not credited	One or more types of educational work provided for by the curriculum have not been completed. The student demonstrates incomplete correspondence of knowledge, skills and abilities given in the tables of indicators, significant errors are made, the lack of knowledge, skills and abilities is manifested in a number of indicators, the student experiences significant difficulties in operating knowledge and skills when transferring them to new situations.

8. Logistics support of discipline.

Training tables with benches, classroom board, portable multimedia complex (projector, projection screen, laptop). Teacher's workplace: table, chair.

9. Guidelines for students when working on lecture notes during a lecture

Lecture - a systematic, consistent, monologue presentation by the teacher of educational material, as a rule, of a theoretical nature. When preparing a lecture, the teacher is guided by the working program of the discipline. In the course of lectures, it is recommended to take notes, which will later allow you to recall the studied educational material, supplement the content during independent work with literature, and prepare for the exam.

You should also pay attention to categories, formulations that reveal the content of certain phenomena and processes, scientific conclusions and practical recommendations, positive experience in oratory. It is advisable to leave fields in the working notes on which to make notes from the recommended literature, supplementing the material of the lecture heard, as well as emphasizing the particular importance of certain theoretical positions.

Lecture conclusions summarize the teacher's reflections on educational issues. The teacher provides a list of used and recommended sources for studying a particular topic. At the end of the lecture, students have the opportunity to ask questions to the teacher on the topic of the lecture. When lecturing on the discipline, electronic multimedia presentations can be used.

Guidelines for students when working at the seminar

Seminars are implemented in accordance with the working curriculum with consistent study of the topics of the discipline. In preparation for the seminars, the student is recommended to study the basic literature, get acquainted with additional literature, new publications in periodicals: magazines, newspapers, etc. In this case, the recommendations of the teacher and the requirements of the curriculum should be taken into account. It is also recommended to refine your lecture notes by making appropriate entries in it from the literature recommended by the teacher and provided by the curriculum. Abstracts should be prepared for presentations on all educational issues submitted to the seminar.

Since the student's activity in seminars is the subject of monitoring his progress in mastering the course, preparation for seminars requires a responsible attitude. In interactive classes, students should be active.

Guidelines for students on the organization of independent work

Independent work of students is aimed at independent study of a separate topic of the academic discipline. Independent work is mandatory for each student, its volume in the course "Modern organizational management structures" is determined by the curriculum. During independent work, the student interacts with the recommended materials with the participation of the teacher in the form of consultations. To perform independent work, methodological support is provided. The electronic library system (electronic library) of the university provides the possibility of individual access for each student from any point where there is access to the Internet.

10. Guidelines for the teacher

(Guidelines for making presentations)

A presentation (from the English word - presentation) is a set of color slide pictures on a specific topic, which is stored in a special format file with the PP extension. The term "presentation" (sometimes called "slide film") is associated primarily with the information and advertising functions of pictures that are designed for a certain category of viewers (users).

Multimedia computer presentation is:

- dynamic synthesis of text, image, sound;
- the most modern software interface technologies;
- interactive contact of the speaker with the demonstration material;
- mobility and compactness of information carriers and equipment;
- ability to update, supplement and adapt information;
- low cost.

Rules for the design of computer presentations

There are certain recommendations that should be followed, at least for novice designers, until they feel the strength and confidence to write their own rules and recommendations.

Font design rules:

- Serif fonts are easier to read than sans-serif fonts;
- Capital letters are not recommended for body text.
- Font contrast can be created through: font size, font weight, style, shape, direction, and color.
- Rules for choosing colors.
- The color scheme should consist of no more than two or three colors.
- There are incompatible color combinations.
- Black color has a negative (gloomy) connotation.
- White text on a black background is hard to read (inversion is hard to read).

Presentation design guidelines

In order for the presentation to be well perceived by the audience and not cause negative emotions (subconscious or completely conscious), it is necessary to follow the rules for its design.

The presentation involves a combination of information of various types: text, graphics, musical and sound effects, animation and video clips. Therefore, it is necessary to take into account the specifics of combining fragments of information of various types. In addition, the design and demonstration of each of the listed types of information is also subject to certain rules. So, for example, for textual information, the choice of font is important, for graphic information - brightness and color saturation, for their best joint perception, optimal relative position on the slide is necessary.

Consider recommendations for the design and presentation of various types of materials on the screen.

Formatting text information:

- font size: 24-54 pt (headline), 18-36 pt (plain text);
- font color and background color should contrast (the text should be well read), but not hurt the eyes;

- font type: smooth sans-serif font for body text (Arial, Tahoma, Verdana), decorative font can be used for heading if it is legible;
- italics, underlining, bold, capital letters are recommended to be used only for semantic highlighting of a text fragment.

Formatting graphic information:

- drawings, photographs, diagrams are designed to supplement textual information or convey it in a more visual form;
- it is desirable to avoid drawings in the presentation that do not carry a semantic load if they are not part of the style design;
- the color of graphic images should not contrast sharply with the overall style of the slide:
- illustrations are recommended to be accompanied by explanatory text;
- if a graphic image is used as a background, then the text on this background should be well readable.

The content and location of information blocks on the slide:

- there should not be too many information blocks (3-6);
- the recommended size of one information block is no more than 1/2 of the slide size;
- it is desirable to have on the page blocks with different types of information (text, graphs, diagrams, tables, figures) that complement each other;
- keywords in the information block must be highlighted;
- information blocks should be placed horizontally, blocks related in meaning from left to right;
- the most important information should be placed in the center of the slide;
- the logic of presenting information on slides and in the presentation should correspond to the logic of its presentation.

In addition to the correct arrangement of text blocks, one must not forget about their content - the text. In no case should it contain spelling errors. You should also take into account the general rules for formatting the text.

After creating a presentation and its design, you need to rehearse its presentation and your performance, check how the presentation will look like as a whole (on a computer screen or projection screen), how quickly and adequately it is perceived from different audience locations, under different lighting conditions, noise accompaniment, in an environment as close as possible to the real conditions of the performance.

The work program was compiled on the basis of the Federal State Educational Standard of Higher Education in the direction of training bachelors on March 38, 02 "Management", approved by order of the Ministry of Education and Science of the Russian Federation of August 12, 2020 No. 970 (Registered in the Ministry of Justice of Russia on August 25, 2020 No. 59449).

The program was made by:

Fehr

The program was approved at a meeting of the department "Management" August 29, 2022, Protocol No. 1

Head of the Department "Management" k. e. PhD, Associate Professor

/Alenina E.E./

Evaluation funds are presented in the appendix to the work program

List of evaluation tools for the discipline "Modern organizational management structures"

OS num ber	Name of the evaluation tool	Brief description of the evaluation tool	Presentation of the evaluation tool in the FOS
one	Report, message (DS)	Product independent work student, which is a public performance on the presentation of the results of solving a specific educational and practical, educational and research or scientific topic	Topics of reports, messages
2	Test (T)	A system of standardized tasks that allows automatethe procedure for measuring the level of knowledge and skills of the student.	Fund of test tasks
3.	Pass (D)	A set of control questions for the exam, allowing you to fix the compliance of the student's answers	Control questions for the test

Questions for offset in the discipline "Modern organizational management structures" formation of competence PC-1

- 1. Modern organizational structures: development, formation.
- 2. The relationship of organization theory with other sciences: give examples, characterize.
- 3. Organization as a process and as a phenomenon: characteristics, examples.
- 4. The concept of "system": definition, examples, types and types of systems.
- 5. Basic concepts of organization theory: list, characterize.
- 6. Place, role, significance and functions of the discipline Theory of organization and organizational behavior in the system of economic sciences.
- 7. Definition of organization and basic concepts of organization theory.
- 8. Classical organization theory in the works of L. Gilbreth
- 9. The classical theory of organization in the works of F.U. Taylor, A. Fayol,
- 10. Organization as a process: essence, regulation, examples.

- 11. Organization as a phenomenon: essence, regulation, types, examples.
- 12. Composition and types of organizational relations: characterize, give examples.
- 13. The content and functions of organizational relations: list, describe, give examples.
- 14. System approach as a method of management: the formation of a system approach, the dynamics of the formation of systems theory.
- 15. System as a set of interrelated operating elements.
- 16. Signs of the system: list and characterize.
- 17. System properties: list and characterize.
- 18. Technical, biological and social (public) subsystems of society: reveal the essence, give examples.
- 19. Classification of systems: list and characterize.
- 20. Features of social systems: list, characterize, give examples.
- 21. How is the static and dynamic state of the organization determined: justify, give examples.
- 22. Linear and ring diagrams of organizational relations: schematic representation, characteristics, examples.
- 23. Wheel-shaped and star-shaped schemes of organizational relations: schematic representation, characteristics, examples.
- 24. Hierarchical scheme of organizational relations: schematic representation, characteristics, examples.
- 25. Staff diagram of organizational relations: schematic representation, characteristics, examples.
- 26. Matrix diagram of organizational relations: schematic representation, characteristics, examples.
- 27. Features of organizational relations in human-machine systems: schematic representation, characteristics, examples.
- 28. The internal environment of the organization: characteristics, examples.
- 29. The external environment of the organization: characteristics, examples.
- 30. Organization management structure and principles of its formation.
- 31. Formation of hierarchical and bureaucratic management structures. Examples.
- 32. Formation of organic (adaptive) management structures. Examples.
- 33. Linear organizational structure: formation, principles, efficiency, advantages, disadvantages.
- 34. Linear-functional organizational structure: formation, principles, efficiency, advantages, disadvantages.
- 35. Linear-staff organizational structure: formation, principles, efficiency, advantages, disadvantages.
- 36. Divisional organizational structure: formation, principles, efficiency, advantages, disadvantages.
- 37. Matrix organizational structure: formation, principles, efficiency, advantages, disadvantages.
- 38. Social organization: characteristics, types, significance in the economy. Examples.

- 39. Classification of social organizations by legal status.
- 40. Economic organization: characteristics, types, significance in the economy. Examples.
- 41. Classification of economic organizations. Examples.
- 42. List and characterize the main unit organizational forms of companies.
- 43. List and characterize the main group organizational forms of companies.
- 44. Communication: definition, basic theories of communication. The essence and tasks of a manager in the field of communication.
- 45. Communication process: characteristics, structure, scheme.
- 46. Types of communications in the organization: list, describe.
- 47. Communication networks: definition, types (for each type a diagram).
- 48. Communication styles: list, characterize, give examples. Factors affecting the effectiveness of communications.
- 49. Law: concept, essence, types, examples.
- 50. Patterns and dependencies in organizations: essence, characteristics, examples.
- 51. Social laws: features, types, examples.
- 52. The law of self-preservation: formulation, the influence of external and internal factors on the self-preservation law.
- 53. Levels of self-preservation: list, characterize, indicate the range of values of the self-preservation parameter.
- 54. The law of synergy: formulation, three options for the operation of the law.
- 55. What determines the potential of an organization? How does the potential of the constituent resources affect the overall potential of the organization?
- 56. List the signs of achieving positive synergy in the organization.
- 57. Law of development: formulation, three variants of the law.
- 58. Law of awareness-orderliness: formulation, three variants of the law.
- 59. The role of information in management activities. Examples.
- 60. The law of unity of analysis and synthesis: formulation, three variants of the law.
- 61. The law of composition and proportionality: formulation, three variants of the law.
- 62. Ensuring harmony in production activities.
- 63. Specific laws of social organization: features, nature of manifestation and action.
- 64. Principles of static organization: list, characterize, give examples.
- 65. Principles of dynamic organization: list, characterize, give examples.
- 66. The composition and content of the principles of self-government.
- 67. Self-organization in the organization: types, elements and efficiency.
- 68. Organizational behavior as a scientific discipline. Goals and objectives of the theory of organizational behavior
- 69. Organizational behavior as a subject of study, management and development
- 70. The concept of "behavior" in modern social science
- 71. Organizational behavior as a kind of social behavior
- 72. Types of organizational behavior
- 73. Basic problems of organizational command
- 74. Approaches to the study of organizational behavior

- 75. Features of organizational behavior
- 76. Organization, organization goals
- 77. Social structure of the organization
- 78. Formal and informal organizational structures
- 79. Personality in an organization
- 80. Opportunities and goals of the individual in the organization
- 81. Expectations of the individual in the organization
- 82. Groups: concepts, classification, stages of development in business processes
- 83. group behavior
- 84. Group cohesion as an indicator of the team's capacity
- 85. Group pressure symptoms
- 86. Informal groups in the organization

Tests

in the discipline "Modern organizational management structures" formation of competence PC-1

- 1. Analysis of the organization's potential allows you to evaluate (choose the correct answer):
 - A) "threats" and "opportunities" of the external environment;
 - B) Does the organization have internal capabilities to ensure the level of its claims;
 - C) the image of the organization;
 - D) other.
- 2. The effectiveness of the organizational management structure is affected by (choose the correct answer):
 - A) the feasibility of the distribution of functions, the definition of powers and responsibilities at various levels of the hierarchy;
 - B) the feasibility of relationships and interactions between elements of the organizational structure;
 - C) management policy and methods for regulating the behavior of people in the organization;
 - D) all together.
 - 3. Organizational science considers the triune organization:
 - a) personnel, production, management;
 - b) planning, control, motivation;
 - c) things, people, ideas;
 - d) attraction, processing of resources, production of products.
 - 4. The subject of organization theory does not include:
 - a) connections and relationships of the structural components of an integral object;

- b) organizational processes and actions in the formation, development and destruction of organizational systems;
- c) organization and self-organization of social systems; d) principles of functioning of organizational systems.
- 5. Creation inside the mechanical structure of various forms of organic
 - A) contributes to (eliminate the wrong answer):
 - B) maintaining controllability;
 - B) ensuring maneuverability;
 - D) increases the ability to update;
 - D) contributes to the centralization of the control mechanism.
- 2. The authors who have made major contributions to the development of classical organization theory include:
 - a) Frederick Winslow Taylor
 - b) Frank Gilbreth;
 - c) Henri Fayol;
 - d) Max Weber;
 - e) Peter Drucker;
 - e) Douglas MacGregor;
 - g) Frederick Herzberg.
- 3. In what period were the principles of organization formulated, the criteria for the formation of organizational structures, and on a systematic basis, research on the theory of organization began to be carried out:
 - a) from 1900-1920;
 - b) from 1920-1940;
 - c) from 1940–1960
- 4. The first scientific approach to the analysis of organizations and the process of managing them is credited to:
 - a) Harrington Emerson "The Twelve Principles of Effectiveness";
 - b) Frederick W. Taylor "Principles of Scientific Management";
 - c) Henri Fayol "General and practical management";
 - d) Bogdanov A.A. "Tectology. General organizational science";
 - e) Luther Gyulik "Notes on the Theory of Organization"
 - f) To Peter Drucker, The Practice of Management.
- 5. Which scientists were given a holistic view of organizational science, formulated its basic principles and patterns, and explained the mechanism of their manifestation:
 - a) F. Taylor;
 - b) A.A. Bogdanov;
 - c) A. Fayol;
 - d) M. Weber;

- e) L. Bertalanffy; f) G. Simon.

 The author of the a) F. Taylor;
- 6. The author of the "bureaucratic" model of organization is:
 - b) A. Fayol;
 - c) M. Weber;
 - d) G. Simon;
 - e) D. North.
- 7. Boundaries of the organization (eliminate the wrong answer):
 - A) are determined by the composition of organizational elements in their relationship and interaction;
 - B) are determined not only by the composition of organizational elements, but also by those elements of the external environment that fall within the sphere of interests of the organization and whose behavior it can influence;
 - C) do not coincide with the established organizational boundaries and depend on the potential of the organization.
- 8. A set of elements representing an autonomous area within a system is called:
 - a) a subgroup;
 - b) subsystem;
 - c) a subset.
- 9. The characteristic features of the organization are:
 - a) complexity;
 - b) departmentalization;
 - c) formalization;
 - d) coordination;
 - e) the ratio of centralization and decentralization;
 - f) socialization;
 - g) horizontal connections.
- 10.In accordance with the main classification, the systems differ in:
 - a) technical;
 - b) political;
 - c) legal;
 - d) biological;
 - e) social.
- 11. What systems are characterized by the obligatory presence of a person in the totality of interrelated elements?
 - a) technical;
 - b) automatic;

- c) automated;
- d) biological;
- e) social.
- 12. What are the main system properties of the organization?
 - a) self-organization;
 - b) ingression;
 - c) conjugation;
 - d) integrity;
 - e) emergence.
- 13. The principles of constructing mechanical structures do not include:
 - A) the principle of unity of leadership;
 - B) the principle of delegation of authority from top to bottom;
 - C) the principle of precise interference from the outside in the powers of the group;
 - D) the principle of the existence of precise boundaries between linear functional management.
- 14. Determine the relationship between the concepts of "dependence" and "law":
 - a) the first concept is broader than the second;
 - b) the second concept is broader than the first;
 - c) the concepts are identical.
- 15. The most correct statement is:
 - a) dependence is a regularity;
 - b) the pattern is a dependency;
 - c) dependence is a law;
 - d) the law is a dependency.
- 16.Laws representing subjective dependencies are called:
 - a) laws for organizations;
 - b) the laws of the organization;
 - c) the laws of organization theory.
- 17. Processes in organizational systems proceed in accordance with:
 - a) general organizational laws;
 - b) private organizational principles and laws;
 - c) general organizational principles;
 - d) specific laws and principles.
- 18. Formal organization is ... (eliminate incorrect answer):
 - A) a planned structure of functions, powers and responsibilities, providing interaction between its elements to achieve the goal;
 - B) a system of relationships between members of the organization, based on group values, postulates of faith, traditions;

- C) a system of relationships between elements of the organization that are predesigned and prescriptively established.
- 19. The static state of the organization implies:
- a) curtailing the activities of the organization;
- b) invariability in time of the main indicators of the organization;
- c) the process of mastering a new market sector;
- d) business strategy.
- 20. The principles of organizational statics determine:
 - a) rules for constructing structures;
 - b) general rules for the formation of organizational processes;
 - c) general rules for the functioning of organizations;
 - d) backbone connections and relationships between elements;
 - e) rules for the progressive development of the organization.
- 21. The form of the dynamic existence of the organization is:
 - a) evolution;
 - b) process;
 - c) ingression;
 - d) biregulation.
- 22. The most correct are judgments:
 - a) the manifestation of stochastic processes does not imply a rigid and unambiguous connection with the state of certain factors;
 - b) stochastic processes are regular;
 - c) controlled processes are regular;
 - d) established processes are more stochastic than transitional ones;
 - e) deterministic processes are not unregulated.
- 11. Social processes are different:
 - a) significant latency;
 - b) high stochasticity;
 - c) high controllability;
 - d) low controllability;
 - e) rigid determinism.
- 12. The structure configuration type, which is a closed decentralized configuration, is:
 - a) "wheel";
 - b) "star";
 - c) "ring";
 - d) "chain";
 - e) "cellular".

- 19. The formation of functionally homogeneous units that do not have specialization is typical for:
 - a) divisional structures;
 - b) linear structures;
 - c) functional structures;
 - d) design structures.
- 20. The high complexity of matrix structures is determined by:
 - a) multiplicity and heterogeneity of bonds;
 - b) a high degree of decentralization;
 - c) polycentricity;
 - d) mixed departmentalization;
 - e) a large number of separate structural units.
- 21. Which organizational structure of management is characterized by independent decision-making and coordination of the work of autonomous working groups:
 - a) design;
 - b) matrix;
 - c) divisional;
 - d) headquarters;
 - e) brigade;
 - e) network.
- 22. Closed configurations are
 - a) "all-channel";
 - b) "fan";
 - c) "wheel";
 - d) "chain";
 - e) "cellular".
- 23. The high importance of line management and the weakness of functional management are typical for:
 - a) linear-functional structures;
 - b) divisional structures;
 - c) headquarters structures;
 - d) matrix structures;
 - e) functional structures.

Answers:

#1 (1 b.)	a
#2 (1 b.)	b
#3 (1 b.)	a

#4 (1 b.)	a
#5 (1 b.)	G
#6 (1 b.)	d
#7 (1 b.)	a
#8 (1 p.)	ь
#9 (1 p.)	in
#10 (1 b.)	ь
#11 (1 p.)	d
#12 (1 p.)	ь
#13 (1 p.)	a
#14 (1 b.)	ь
#15 (1 b.)	G
#16 (1 p.)	G
#17 (1 p.)	a
#18 (1 p.)	ь
#19 (1 p.)	a
#20 (1 b.)	in
#21 (1 b.)	in
#22 (1 b.)	G

Test Evaluation Criteria

grade 5 (excellent) - 95% correct answers;

grade 4 (good) - 80 - 94% correct answers;

grade 3 (satisfactory) - 60 - 79% of correct answers;

grade 2 (unsatisfactory) - less than 60% of correct answers.

Topics of reports by discipline "Modern organizational structures of management» formation of competence PC-1:

one Comparative analysis of models of development and life cycle of an organization.

- 2 Justification of the ways of simultaneous use in the work of the head of the laws of functionsnirovaniya and development of business processes.
 - Ways to overcome pathologies in the structure of the organization.

four Ways to overcome pathologies in the organizational relations of the enterprise.

- 5 Ways to overcome pathologies in managerial decisions.
- 6 Measures to overcome resistance to organizational change.

7 A rational list of measures along the axes of the "transformation triangle" of the process of transformation in the organization.

one A rational list of activities carried out in the organization while following the "route map" of the transformation process.

- 2 A rational list of activities carried out in the organization in the implementation of the "natural laws" of the transformation process.
- 3 Justification of the advantages and disadvantages of the organizational change management modelK. Levin.

four Justification of the advantages and disadvantages of the organizational change management modelL. Greiner.

- 5 Justification of the advantages and disadvantages of the organizational change management modelB.Hinings.
- 6 Substantiation of the advantages and disadvantages of the theory E andtheory about organizational change management.
- 7 Justify the advantages and disadvantages of the business transformation modelF. Guiyara and J. Kelly.

one Justification of the advantages and disadvantages of the curve of change model J. Duck.

- 2 Organizational mechanism for introducing the principles of business process reengineering into the activities of an enterprise.
- 3 Organizational mechanism for implementationbenchmarking project at the enterprise.

four Organizational mechanism for the implementation of the concept of "six sigma" in the enterprise.

- 5 Activity, behavior, work, organizational behavior.
- 6 Private property is the main resource factor of human activity.
- 7 Contradictions and conflicts as a content essence of organizational behaviorin business processes.

Report Evaluation Criteria

N	Criterion	Grade			
o		ex.	choir.	satisfactory	unsatisfactory
o	Report	The report	The report	One of the	The report does
n	Structure	contains semantic	contains three	semantic parts of	not trace the
e		parts, balanced in	semantic parts,	the report is	presence of
		volume	unbalanced in	missing	semantic parts
			volume
