**WORKING PROGRAM OF THE DISCIPLINE**

**"Small Business Management"**

Field of study

**38.03.02 Management**

Educational program (profile)

**"Business Process Management"**

Qualification (degree)

**Bachelor**

Form of study

**Part-time**

Moscow 2022

## 1. The goals of mastering the discipline

**primary goal** mastering the discipline "Management of a small business" - the acquisition by students of complex knowledge, skills and the formation of competencies in the field of the organizational and economic mechanism of the functioning of small businesses.

**Main tasks** discipline "Management of small business" should include the development of knowledge by students in the following areas:

- the content of the concept of "entrepreneurship" and the history of its development;
- socio-psychological characteristics of the entrepreneur's personality;
- principles and technology of small business creation;
- principles and technology of small business management.

## 2. The place of the discipline in the structure of the bachelor's program

The discipline "Small Business Management" is one of the elective disciplines (B1.2.ED) of the bachelor's degree program.

The discipline "Small Business Management" is interconnected logically and methodically with the following disciplines and practices of the EP:

- Management in industries and fields of activity;
- Management of innovative business processes;
- Management and evaluation of the effectiveness of business processes;
- Perspective management.

## 3. The list of planned learning outcomes for the discipline (module), correlated with the planned results of mastering the educational program.

As a result of mastering the discipline, students form the following competence and the following learning outcomes should be achieved as a stage in the formation of the relevant competence:

| Competency code | As a result of mastering the educational program, the student must have  | List of planned learning outcomes by discipline  |
|-----------------|--|--|
| PC-6            | Able to form possible solutions based on the target indicators developed for them, as well as to analyze, justify and select solutions | <b>know:</b><br>- the main trends in the development of small forms of entrepreneurship;<br><b>be able to:</b><br>- collect, summarize and analyze the necessary economic information, including the results of the latest research by domestic and foreign economists |

#### **4. Structure and content of the discipline**

##### **Part-time education:**

The total labor intensity of the discipline is 3 credit units, i.e. 108 academic hours (of which 72 hours are independent work of students).

Sections of the discipline "Small Business Management" are studied in the third year.

**Fifth semester:** lectures - 18 hours, seminars - 18 hours, form of control - test.

The structure and content of the discipline "Small Business Management" in terms of terms and types of work are reflected in the Appendix.

##### **The content of the sections of the discipline**

##### **Topic 1 History of development, concept and essence of small business**

Small and medium business is a key basic component of the market economy, and also represents one of the most promising forms of production and economic relations. The main areas of functioning of small businesses include, first of all, wholesale and retail trade, transport, public catering, consulting, construction and agriculture. Small and medium-sized businesses not only perform the key functions of a manufacturer of consumer goods, but also play an important role as an agent of market relations, as well as an employer and taxpayer.

Possessing the necessary mobility and adaptability in market conditions, small business can significantly strengthen the economic stability of both individual regions and entire regions of our country.

##### **Topic 2 Modern forms of organizing small business in Russia**

Small enterprises, like any other, are formed primarily in accordance with federal laws, as well as other legislative and regulatory legal acts.

The activities of small businesses have many varieties and can be classified according to several criteria, such as purpose and type, functions, size, legal and organizational and economic forms, forms of ownership, etc.

With regard to the form of ownership and the number of owners, from this point of view, small businesses are divided into both private and public, and collective and individual. In terms of organizational and legal forms, there are both commercial and non-commercial small and medium-sized enterprises. The most widespread organizational and

legal forms of small business are production cooperatives, as well as business companies and partnerships.

### **Topic 3 Modern problems, trends and prospects for the development of small businesses**

The pace of development of small business in the Russian Federation is relatively low compared to countries with highly developed market economies. At the same time, the functioning of small business in Russia is influenced by both internal factors, which are determined primarily by the state of the small business itself, and external ones, which depend on the internal economic situation, the political situation, state support for small business, etc.

The peculiarity of small businesses is that they operate in the local market, which, unlike the markets of large enterprises, is characterized by a much higher degree of uncertainty. Also, small businesses are characterized by a stronger subordination in the system of state relations compared to large businesses.

Small businesses have significantly more risks in the process of implementing projects and introducing innovative technologies. Increasing rents for premises and equipment, as well as high taxes and a lack of capital risk capital, also have a strong impact on its operations. In addition, the development of small businesses is negatively affected by: the underdevelopment of the production infrastructure, the weakness of the information base and the lack of specialized equipment.

### **Topic 4 Innovation potential of small businesses**

Small business makes a significant contribution to the economic stability of our country, and also plays an important role in increasing the competitiveness of Russia in the field of scientific and technological progress.

The innovative potential of small businesses is determined by the fact that small and medium-sized enterprises are actively involved in scientific and production and research developments. Small firms are much more successful in unpromising industries and are more willing to engage in risky developments. The implementation process in small businesses is much faster, they quickly establish mass production. The latter is explained by more effective teamwork, which is due to a small number of employees united by common goals and objectives.

The central problem for the development of small and medium-sized enterprises is attracting investments, which is especially important for science-intensive industries and modern innovative developments that require significant investments at the design stage and the creation of experimental versions of innovative technologies and products.

### **Topic 5 Risks, reliability and adaptability of small businesses**

In a market economy, risk is one of the key elements of business. This is also stated in the Civil Code of the Russian Federation, which states that businessmen carry out their activities at their own peril and risk.

Business risks depend on many factors. The risks arising in the field of entrepreneurial activity can be divided into: production, related to the implementation of the company's immediate tasks and goals, as well as financial, which indicate the possibility or impossibility of the company to fulfill its monetary obligations to partners. In addition, there are commercial risks that are determined primarily by external causes and associated with the sale of goods and services on the market. Insurance risks are the risks of insured events that cannot be predicted and calculated, but their monetary equivalent can be measured.

#### **Topic 6 Small Business Business Plan**

A business plan plays a huge role in small business operations. The business plan contains the main provisions governing the functioning of a small business, and also includes all the components of an effective marketing program. It is difficult for small businesses to implement large-scale projects with a large investment of funds. At the same time, such enterprises can use specific models for building business plans using existing program strategies.

#### **Topic 7 Features of managerial decision-making in small business**

Making the right decision in a timely manner is the main task of any manager. The wrong decision can be especially expensive for small businesses, whose financial resources are very limited. In this case, competent management is of great importance, since well-thought-out and coordinated decisions are the basis for successful management of small businesses.

#### **Topic 8 Planning the main financial indicators of a small business**

At small enterprises, the preparation of a plan involves the formation of a cash flow forecast, a balance sheet of assets and liabilities, a cost and profit plan.

The purpose of financial modeling in a small business is the need to quickly and reliably assess the future performance of an upcoming business in order to get an answer whether it is worth pursuing this project.

A financial model is necessary in all cases when it comes to raising funds, as it is an integral part of a business plan and is necessary for negotiations with a potential investor.

#### **Topic 9 Small Business Management Tools**

Ensuring the competitiveness of small and medium-sized organizations, their adaptability and mobility is a key task of strategic planning. The latter is impossible without an analysis of the internal and external environment of small businesses, which makes it possible to find out all the strengths and weaknesses of small businesses.

### **5. Educational technologies**

The methodology of teaching the discipline "Small Business Management" and the implementation of a competency-based approach in the presentation and perception of the

material provides for the use of the following active and interactive forms of conducting group, individual, classroom classes in combination with extracurricular work in order to form and develop the professional skills of students:

- lectures;
- preparation for seminars;
- preparation, presentation and discussion of reports at seminars;
- organization and conduct of current control of students' knowledge in the form of testing.

The proportion of classes conducted in interactive forms is determined by the main goal of the educational program, the peculiarity of the contingent of students and the content of the discipline "Small business management" and in general in the discipline is at least 50% of the classroom.

## **6. Evaluation tools for current monitoring of progress, intermediate certification based on the results of mastering the discipline and educational and methodological support for independent work of students**

In the learning process, the following assessment forms of independent work of students, assessment tools for monitoring progress and intermediate assessments are used:

Evaluative means of monitoring progress include control questions and tasks in the form of blank testing, participation in a business game, and presentation of a report.

When performing current control, it is possible to use test material. Samples of control questions and tasks for conducting current control are given in the appendix. When implementing the undergraduate program, the organization has the right to use e-learning and distance learning technologies. All materials are posted in the LMS of the Moscow Poly (<https://online.mospolytech.ru/course/view.php?id=9716>).

When teaching people with disabilities, e-learning and distance learning technologies should provide for the possibility of receiving and transmitting information in forms accessible to them.

Samples of questions and tasks for conducting current control are given in the appendix.

### **6.1. Fund of assessment tools for conducting intermediate certification of students in the discipline (module).**

#### **6.1.1. A list of competencies indicating the stages of their formation in the process of mastering the educational program.**

As a result of mastering the discipline (module), the following competence is formed:

|                        |  |
|------------------------|--|
| <b>Competency code</b> | <b>As a result of mastering the educational program, the student must have</b>   |
| PC-6                   | Able to form possible solutions based on the target indicators developed for them, as well as to analyze, justify and select solutions |

In the process of mastering the educational program, this competence, including their individual components, is formed in stages during the development of disciplines (modules), practices by students in accordance with the curriculum and calendar schedule of the educational process.

### 6.1.2. Description of indicators and criteria for assessing competencies formed on the basis of the results of mastering the discipline (module), description of assessment scales

An indicator of competency assessment at various stages of their formation is the achievement by students of the planned learning outcomes in the discipline (module).

| <b>PC-6</b> -Able to form possible solutions based on the target indicators developed for them, as well as to analyze, justify and select solutions |  |  |  |   |

The learner experiences significant difficulties in applying skills in new situations.  | The student owns the categorical and lexical apparatus of economic sciences at the level of knowledge and free use, but minor errors, inaccuracies, difficulties in analytical operations, transferring skills to new, non-standard situations are allowed. | The student fully owns the categorical and lexical apparatus of economic sciences at the level of knowledge and free use, freely applies the acquired skills in situations of increased complexity. |

Scales for assessing the results of intermediate certification and their description:

***Form of intermediate attestation: test.***

Intermediate attestation of students in the form of a test is carried out based on the results of the implementation of all types of educational work provided for by the curriculum for a given discipline (module), while taking into account the results of current monitoring of progress during the semester. The assessment of the degree of achievement by students of the planned learning outcomes in the discipline (module) is carried out by the teacher conducting classes in the discipline (module) by the method of expert assessment. According to the results of the intermediate certification, “pass” or “not pass” is set.

*Only students who have completed all types of academic work provided for by the work program in the discipline "Small Business Management" are allowed to the intermediate certification (passed the intermediate control)*

| Evaluation scale | Description  |
|------------------|--|
| Passed           | All types of educational work provided for by the curriculum were completed. The |

|              |   |
|--------------|---|
|              | student demonstrates the correspondence of knowledge, skills and abilities given in the tables of indicators, operates with the acquired knowledge, skills, skills, applies them in situations of increased complexity. In this case, minor errors, inaccuracies, difficulties in analytical operations, transferring knowledge and skills to new, non-standard situations can be made.   |
| Not credited | One or more types of educational work provided for by the curriculum have not been completed. The student demonstrates incomplete correspondence of knowledge, skills and abilities given in the tables of indicators, significant errors are made, lack of knowledge, skills, skills is manifested in a number of indicators, the student experiences significant difficulties in operating knowledge and skills when transferring them to new situations. |

**The evaluation funds are presented in the annex to the work program.**

## **7. Educational, methodological and information support of the discipline "Small business management"**

### **a) basic literature:**

1. Kuzmina E. E. Organization of entrepreneurial activity: a textbook for universities - 4th ed., Revised. and additional - M.: Yurayt Publishing House, 2021. - 455 p. - (Higher education). - ISBN 978-5-534-14024-8. — Text: electronic // Educational platform Urayt [website]. — URL: <https://urait.ru/bcode/468235>

### **b) additional literature:**

1. Kuptsova E. V. Business planning: textbook and workshop for secondary vocational education - M.: Yurayt Publishing House, 2021. - 435 p. - (Professional education). - ISBN 978-5-534-11053-1. — Text: electronic // Educational platform Urayt [website]. — URL: <https://urait.ru/bcode/476085>

2. Golov R.S., Agarkov A.P., Mylnik A.V. Organization of production, economics and management in industry: textbook. M.: Publishing and Trade Corporation "Dashkov and Co", 2017. 858 p. <http://www.knigafund.ru/books/198943>

The possibility of using e-learning, distance learning technologies is provided. All materials are placed in the LMS of the Moscow Poly. (<https://online.mospolytech.ru/course/view.php?id=9716>)

## **eight. Logistics support of discipline.**

Audience for lectures and seminars of the general fund. Training tables with benches, classroom board, portable multimedia complex (projector, projection screen, laptop). Teacher's workplace: table, chair.

## **9. Guidelines for students when working on lecture notes during the lecture**

Lecture - a systematic, consistent, monologue presentation by the teacher of educational material, as a rule, of a theoretical nature. When preparing a lecture, the teacher is guided by the working program of the discipline. In the course of lectures, it is recommended to take notes, which will later allow you to recall the studied educational material, supplement the content during independent work with literature, and prepare for the exam.

You should also pay attention to categories, formulations that reveal the content of certain phenomena and processes, scientific conclusions and practical recommendations, positive experience in oratory. It is advisable to leave fields in the working notes on which to make notes from the recommended literature, supplementing the material of the lecture heard, as well as emphasizing the particular importance of certain theoretical positions.

Lecture conclusions summarize the teacher's reflections on educational issues. The teacher provides a list of used and recommended sources for studying a particular topic. At the end of the lecture, students have the opportunity to ask questions to the teacher on the topic of the lecture. When lecturing on the discipline, electronic multimedia presentations can be used.

#### **Guidelines for students when working at the seminar**

Seminars are implemented in accordance with the working curriculum with consistent study of the topics of the discipline. In preparation for the seminars, the student is recommended to study the basic literature, get acquainted with additional literature, new publications in periodicals: magazines, newspapers, etc. In this case, the recommendations of the teacher and the requirements of the curriculum should be taken into account. It is also recommended to refine your lecture notes by making appropriate entries in it from the literature recommended by the teacher and provided by the curriculum. Abstracts should be prepared for presentations on all educational issues submitted to the seminar.

Since the student's activity in seminars is the subject of monitoring his progress in mastering the course, preparation for seminars requires a responsible attitude. In interactive classes, students should be active.

#### **Guidelines for students on the organization of independent work**

Independent work of students is aimed at independent study of a separate topic of the academic discipline. Independent work is mandatory for each student, its volume is determined by the curriculum. During independent work, the student interacts with the recommended materials with the participation of the teacher in the form of consultations. To perform independent work, methodological support is provided. The electronic library system (electronic library) of the university provides the possibility of individual access for each student from any point where there is access to the Internet.

### **10. Methodological recommendations for the teacher (Guidelines for making presentations)**

A presentation (from the English word - presentation) is a set of color slide pictures on a specific topic, which is stored in a special format file with the PP extension. The term "presentation" (sometimes called "slide film") is associated primarily with the information and advertising functions of pictures that are designed for a certain category of viewers (users).

Multimedia computer presentation is:

- dynamic synthesis of text, image, sound;
- the most modern software interface technologies;
- interactive contact of the speaker with the demonstration material;
- mobility and compactness of information carriers and equipment;
- ability to update, supplement and adapt information;
- low cost.

Rules for the design of computer presentations

General Design Rules

Many designers argue that there are no laws and rules in design. There are tips, tricks, tips. Design, like any kind of creativity, art, like any way of some people to communicate with others, like language, like thought, will bypass any rules and laws.

However, there are certain recommendations that should be followed, at least for novice designers, until they feel the strength and confidence to create their own rules and recommendations.

Font design rules:

- Serif fonts are easier to read than sans-serif fonts;
- Capital letters are not recommended for body text.
- Font contrast can be created through: font size, font weight, style, shape, direction, and color.
- Rules for choosing colors.
- The color scheme should consist of no more than two or three colors.
- There are incompatible color combinations.
- Black color has a negative (gloomy) connotation.
- White text on a black background is hard to read (inversion is hard to read).

Presentation design guidelines

In order for the presentation to be well perceived by the audience and not cause negative emotions (subconscious or completely conscious), it is necessary to follow the rules for its design.

The presentation involves a combination of information of various types: text, graphics, musical and sound effects, animation and video clips. Therefore, it is necessary to take into account the specifics of combining fragments of information of various types. In addition, the design and demonstration of each of the listed types of information is also

subject to certain rules. So, for example, for textual information, the choice of font is important, for graphic information - brightness and color saturation, for their best joint perception, optimal relative position on the slide is necessary.

Consider recommendations for the design and presentation of various types of materials on the screen.

Formatting text information:

- font size: 24-54 pt (headline), 18-36 pt (plain text);
- font color and background color should contrast (the text should be well read), but not hurt the eyes;
- font type: smooth sans-serif font for body text (Arial, Tahoma, Verdana), decorative font can be used for heading if it is legible;
- italics, underlining, bold, capital letters are recommended to be used only for semantic highlighting of a text fragment.

Formatting graphic information:

- drawings, photographs, diagrams are designed to supplement textual information or convey it in a more visual form;
- it is desirable to avoid drawings in the presentation that do not carry a semantic load if they are not part of the style design;
- the color of graphic images should not contrast sharply with the overall style of the slide;
- illustrations are recommended to be accompanied by explanatory text;
- if a graphic image is used as a background, then the text on this background should be well readable.

The content and location of information blocks on the slide:

- there should not be too many information blocks (3-6);
- the recommended size of one information block is no more than 1/2 of the slide size;
- it is desirable to have on the page blocks with different types of information (text, graphs, diagrams, tables, figures) that complement each other;
- keywords in the information block must be highlighted;
- information blocks should be placed horizontally, blocks related in meaning - from left to right;
- the most important information should be placed in the center of the slide;
- the logic of presenting information on slides and in the presentation should correspond to the logic of its presentation.

In addition to the correct arrangement of text blocks, one must not forget about their content - the text. In no case should it contain spelling errors. You should also take into account the general rules for formatting the text.

After creating a presentation and its design, you need to rehearse its presentation and your performance, check how the presentation will look like as a whole (on a computer screen or projection screen), how quickly and adequately it is perceived from different audience locations, under different lighting conditions, noise accompaniment, in an environment as close as possible to the real conditions of the performance.

The work program was compiled on the basis of the Federal State Educational Standard of Higher Education in the direction of training bachelors on March 38, 02 "Management", approved by order of the Ministry of Education and Science of the Russian Federation of August 12, 2020 No. 970 (Registered in the Ministry of Justice of Russia on August 25, 2020 No. 59449).

**The program was made by:**
