- organizational and managerial,

- design and analytical.

The master's program in the field of study 42.04.01 Advertising and Public Relations, the profile "Innovative Marketing in Advertising" is focused on the following objects of professional activity of graduates:

 life cycle processes of science-intensive and infrastructure innovations, including research and development, inventive activity, engineering cycle processes and innovation business cycle processes, including seed and venture capital investments;

- the sphere of science-intensive and infrastructure innovations as a socioeconomic phenomenon;

- socio-economic, mathematical, physical models, methods and means of fundamental and applied research and development in the field of promoting science-intensive and infrastructural innovations in the profiles of subject activity.

The master's program in the field of study 42.04.01 Advertising and public relations, the profile "Innovative marketing in advertising" does not contain information constituting a state secret.

IV. Correlation of professional standards with the Federal State Educational Standard of Higher Education

The list of generalized labor functions and labor functions corresponding to the professional activity of a graduate of the master's program in the direction of training 42.04.01 Advertising and public relations, the profile "Innovative marketing in advertising" is presented in table 1.

Code and name of the		Generalized labor functions		Labor functions		
professional standard	the cod e	Name	skill level	Name	the code	level (sublevel) of qualification
08.035 "Marketer"	В	Development and implementation of marketing programs using marketing mix tools	7	Development, testing and implementation of innovative goods (services), creation of intangible assets (brands) and their management in the organization	B/01.7	7
06.013 "Specialist in information resources"	С	Management of information	6	Organization of work on creating and editing content	C/01.6	6
		resources	6	Managing information from various sources	C/02.6	6

Table 1 - The list of generalized labor functions and labor functions corresponding to the professional activity of a graduate of the master's program in the field of study 42.04.01 Advertising and public relations, profile "Innovative marketing in advertising"

V. Structure and scope of the educational program

The structure of the master's program includes the following blocks:

Block 1 "Disciplines (modules)".

Block 2 "Practice".

Block 3 "State final certification".

Table 2 - The structure of the master's program in the field of study 42.04.01 Advertising and public relations, profile "Innovative marketing in advertising"

		The volume of the master's
The	e structure of the master's program	program and its blocks in
		CU
Block 1	Disciplines (modules)	72
Block 2 Practice		39
Block 3 State final certification		9
Scope of the Master's program		120

Block 2 "Practice" includes educational and industrial practices.

Types of work experience:

- professional and creative practice;
- research practice;
- research work;
- undergraduate practice.

Block 3 "State final certification" includes:

- fulfillment, preparation for passing and passing the state exam;

- preparation for the defense procedure and defense of the final qualifying work.

The master's program in the field of study 42.04.01 Advertising and public relations, the profile "Innovative marketing in advertising" provides students with the opportunity to master elective disciplines (modules) and optional disciplines (modules). Optional disciplines (modules) are not included in the scope of the master's program.

The master's program in the field of study 42.04.01 Advertising and public relations, the profile "Innovative marketing in advertising" includes a mandatory part and a part formed by participants in educational relations. The volume of the compulsory part, excluding the volume of the state final certification, is 46 percent of the total volume of the master's program.

The University provides disabled people and persons with disabilities (at their request) with the opportunity to study under the master's program, considering the peculiarities of their psychophysical development, individual capabilities and, if necessary, providing correction of developmental disorders and social adaptation of these persons.

VI. Planned results of mastering the educational program

As a result of mastering the master's program in the direction of training 42.04.01 Advertising and public relations, the profile "Innovative marketing in advertising", the graduate should have the following competencies established by the master's program (tables 3-5).

Category of competenciesCode and name of competenceCode and content of the indicator of achievement of competenceSystems and criticalUC-1. Able to carry out a critical analysis of problem situations based on a systematic approach, develop an action strategyIUC-1.1. The professional competencies established by the undergraduate program are formed based on professional standards, analysis of the requirements for professional competencies for graduates in the labor market, consultations with leading employers in which graduates are in demand.

The set of competencies established by the master's program provides the graduate with the ability to carry out professional activities in at least one area of professional activity and field of professional activity and the ability to solve problems of professional activity of at least one type.

The set of planned learning outcomes in disciplines (modules) and practices ensures the formation of all the competencies established by the master's program in the graduate.

VII. Methodological support for the implementation of the program

The curriculum determines the list and sequence of mastering disciplines, practices, intermediate and state final certification, their labor intensity in credit units and academic hours, the distribution of contact work of students with the teacher (including lectures, practical, laboratory types of classes, consultations) and independent work of students .

The curriculum and study schedule, which determines the terms and periods for the implementation of types of educational activities and vacation periods, are presented in Appendix 1.

The matrix of compliance of competencies with the disciplines of the curriculum is presented in Appendix 2.

The work programs of the disciplines are presented in Appendix 3. The practice programs are presented in Appendix 4.

To conduct the state final attestation, the State Final Attestation Program has been developed: including a program for preparing for passing and passing the state exam and a program for preparing for the procedure for defending and defending the final qualification work (Appendix 5).

Evaluation tools are presented in the form of a fund of evaluation tools for intermediate certification of students and for the state final certification. The fund of assessment tools for conducting intermediate certification of students in a discipline (module) or practice is part of the corresponding work program of the discipline (module) or practice program. The Fund of Evaluation Funds for the State Final Attestation is part of the State Final Attestation Program: including the preparation program for passing and passing the state exam and the preparation program for the defense and defense of the final qualification work.

VIII. Conditions for the implementation of the master's program 1. Fulfillment of system-wide requirements for program implementation

The University legally has the material and technical support of educational activities (premises and equipment) for the implementation of the master's program in the field of study 42.04.01 Advertising and public relations, profile "Innovative marketing in advertising" in Block 1 "Disciplines (modules)" and Block 3 "State final certification" in accordance with the curriculum.

Each student during the entire period of study is provided with individual unlimited access to the electronic information and educational environment of the University, which includes several electronic library systems (electronic libraries), from any point where there is access to the information and telecommunication network "Internet" (hereinafter - the network "Internet"), both on the territory of the University and outside it.

The electronic information and educational environment of the University provides:

 access to curricula, work programs of disciplines (modules), practices, electronic educational publications and electronic educational resources specified in the work programs of disciplines (modules), practice programs;

- the formation of an electronic portfolio of the student, including the preservation of his works and marks for these works.

In the case of the implementation of the master's program in the direction of training 42.04.01 Advertising and public relations, the profile "Innovative marketing in advertising" using e-learning, distance learning technologies of the University EIOS additionally provides:

- fixing the course of the educational process, the results of intermediate certification and the results of mastering the master's program;

- conducting training sessions, procedures for assessing learning outcomes, the implementation of which is provided for using e-learning, distance learning technologies;

- interaction between participants in the educational process, including synchronous and (or) asynchronous interaction via the Internet.

The functioning of the EIEE is ensured by the appropriate means of information and communication technologies and the qualifications of the employees using and supporting it. The functioning of the electronic information and educational environment complies with the legislation of the Russian Federation.

2. Fulfillment of the requirements for the material, technical and educational and methodological support of the program

Premises for the implementation of the master's program in the direction of training 42.04.01 Advertising and public relations, the profile "Innovative marketing in advertising" are classrooms for conducting training sessions, equipped with equipment and teaching aids, the composition of which is defined in the work programs of disciplines (modules).

Premises for independent work of students are equipped with computers with the ability to connect to the Internet and provide access to the electronic information and educational environment of the University.

Information about the logistics of the master's program in the field of study 42.04.01 Advertising and public relations, the profile "Innovative marketing in advertising" is presented in Appendix 6.

When using printed publications in the educational process, the library fund of the University is equipped with printed publications at the rate of at least 0.25 copies of each of the publications specified in the work programs of disciplines (modules), practices, per one student from among persons simultaneously mastering the corresponding discipline (module) undergoing relevant internships.

Students are provided with access (remote access) to modern professional databases and information reference systems, the composition of which is defined in the work programs of disciplines (modules).

Students from among the disabled and persons with disabilities are provided with printed and (or) electronic educational resources in forms adapted to the limitations of their health.

3. Compliance with the requirements for personnel conditions for the implementation of the program

The implementation of the master's program in the direction of training 42.04.01 Advertising and public relations, the profile "Innovative marketing in advertising" is provided by the teaching staff of the University, as well as persons involved by the University in the implementation of the program on other conditions.

The qualifications of the teaching staff of the University meet the qualification requirements specified in the qualification reference books and (or) professional standards (if any).

More than 75 percent of the number of teaching staff of the University involved in the implementation of the program, and persons involved by the University in the implementation of the program on other conditions (based on the number of positions to be replaced, reduced to integer values), conduct scientific, educational, and methodological and (or) practical work corresponding to profile of the taught discipline (module).

More than 10 percent of the number of teaching staff of the University involved in the implementation of the program, and persons involved by the University in the implementation of the program on other conditions (based on the number of replacement positions reduced to integer values), are managers and (or) employees of other organizations engaged in labor activities in professional field corresponding to the professional activity for which graduates are preparing (they have at least 3 years of work experience in this professional field).

More than 60 percent of the number of teaching staff of the University and persons involved in the educational activities of the University on other terms (based on the number of replacement positions reduced to integer values) have a degree (including a degree obtained in a foreign country and recognized in the Russian Federation) and (or) an academic title (including an academic title obtained in a foreign state and recognized in the Russian Federation).

General management of the scientific content of the master's program is carried out by a scientific and pedagogical worker of the University who has a scientific degree (including a scientific degree obtained in a foreign state and recognized in the Russian Federation), carrying out independent research (creative) projects (participating in the implementation of such projects) in the direction of training, having annual publications based on the results of the specified research activities in leading domestic and (or) foreign peer-reviewed scientific journals and publications, as well as carrying out annual approbation of the results of the specified research activities at national and international conferences.

Program staffing information presented in Annex 7.

4. Fulfillment of the requirements for the financial conditions for the implementation of the program

Financial support for the implementation of the master's program in the direction of training 42.04.01 Advertising and public relations, the profile "Innovative marketing in advertising" is carried out in an amount not lower than the values of the basic cost standards for the provision of public services for the implementation of educational programs of higher education - master's programs and the values of adjusting coefficients to the basic cost standards determined by the Ministry of Science and Higher Education of the Russian Federation.

5. Fulfillment of the requirements for the applied mechanisms for assessing the quality of educational activities and training students under the program

The quality of educational activities and training of students in the master's program in the field of study 42.04.01 Advertising and public relations, the profile "Innovative Marketing in Advertising" is determined within the framework of the internal evaluation system, as well as the external evaluation system, in which the University participates on a voluntary basis.

To improve the master's program, the University, when conducting a regular internal assessment of the quality of educational activities and training students in the master's program in the direction of training 42.04.01 Advertising and public relations, the profile "Innovative marketing in advertising" attracts employers and (or) their associations, other legal and (or) individuals, including teaching staff of the University.

Within the framework of the internal system for assessing the quality of educational activities under the master's program in the field of study 42.04.01 Advertising and public relations, the profile "Innovative marketing in advertising", students are given the opportunity to assess the conditions, content, organization, and quality of the educational process as a whole and individual disciplines (modules) and practice.

External quality assessment of educational activities under the master's program in the field of study 42.04.01 Advertising and public relations, profile "Innovative Marketing in Advertising" within the framework of the state accreditation procedure is carried out to confirm the compliance of educational activities under the master's program with the requirements of the Federal State Educational Standard of Higher Education.

External assessment of the quality of educational activities and training of students in the master's program in the field of study 42.04.01 Advertising and public relations, the profile "Innovative marketing in advertising" is carried out within the framework of professional and public accreditation conducted by employers, their associations, as well as organizations authorized by them, including foreign organizations, or authorized national professional and public organizations that are part of international structures, in order to recognize the quality and level of training of graduates that meet the requirements of professional standards (if any), labor market requirements for specialists of the relevant profile.

IX. Features of the organization of the educational process for the disabled and persons with disabilities

The master's educational program in the field of study 42.04.01 Advertising and Public Relations, the profile "Innovative Marketing in Advertising" provides for the implementation of an organizational model of inclusive education ensuring equal access to education for all students, considering the diversity of special educational needs and individual opportunities.

The University provides (if necessary and if there is a relevant application from a person recognized as disabled or with disabilities) the development of individual curricula and individual training schedules (both with a set period for mastering the OBOR, and with an increase in the period for mastering the OBOR). The term for obtaining higher education when mastering the educational program of the master's program in the direction of training 42.04.01 Advertising and public relations, the profile "Innovative marketing in advertising" according to the individual curriculum for the disabled and persons with disabilities can be increased, if necessary, but not more than for six months . The decision to extend the term of study is made based on a personal application of the student.

When drawing up an individual training schedule, various options for conducting classes can be provided:

- in an academic group or individually;
- at home using e-learning and distance learning technologies (DET).

The choice of teaching methods in the preparation of an individual schedule is carried out based on their accessibility for people with disabilities and people with disabilities. In the educational process, socially active and reflective teaching methods, technologies of sociocultural rehabilitation can be used to assist in establishing full-fledged interpersonal relationships with other students, creating a comfortable psychological climate in the student group.

When carrying out current control, intermediate and final certification, the features of the nosology of people with disabilities and persons with disabilities are considered (including the conduct of control measures in a remote format, if necessary and if there is a corresponding application from the student).

The University provides disabled people and persons with disabilities with special material and technical training aids (including special software) if students have the appropriate nosologies and receive their applications for the need to provide special material and technical training aids.

The University provides disabled people and people with disabilities with printed and electronic educational resources in forms adapted to the limitations of their health if students have the appropriate nosology's and receive their applications for the need to provide specialized electronic educational resources. The EBS used at the University make it possible to realize the following opportunities for inclusive education:

- EBS "URAIT" (https://urait.ru/) has a special version for use by visually impaired students;

- EBS "IPR BOOKS" (http://www.iprbookshop.ru /) has a special adaptive version of the site for visually impaired users. This version assumes additional tools for increasing the size of the text, choosing the color scheme of the design, changing the kerning, which allow you to increase the availability of the site without resorting to the use of third-party assistive technologies. The version of the EBS website for the visually impaired contains alternative formats of printed materials (large font and audio files) to ensure the educational process. A special adaptive reader on the website for reading books allows you to increase the text up to 400% without loss of quality.

The form of intermediate and state final certification for students with disabilities and persons with disabilities is established considering individual psychophysical characteristics (orally, in writing on paper, in writing on a computer, in the form of testing, etc.).

For graduates from among the disabled and persons with disabilities, the state final certification is carried out by the University, considering the characteristics of the psychophysical development, individual capabilities, and health status of such graduates. When disabled people and persons with disabilities apply to the chairman of the state examination commission, they are given additional time to prepare a response.

When conducting the GIA, the chairman of the state examination commission ensures compliance with the following general requirements:

- conducting a GIA for people with disabilities in the same classroom together with graduates who do not have disabilities, if this does not create difficulties for graduates when passing the GIA;

- the presence in the audience of an assistant (at the request of the graduate) who provides the necessary technical assistance to the graduate, taking into account his individual characteristics (take a seat in the audience, read a report, move around, communicate with members of the state examination committee);

- the use by graduates of the technical means they need when passing the GIA, taking into account their individual characteristics;

- ensuring the possibility of unhindered access for graduates with disabilities and those with disabilities in the classroom, toilet, and other premises, as well as their stay in these premises.

Disabled graduates or their legal representatives at least one month prior to the start of the State Examination apply to the University management about the need to create special conditions for them during the State Examination.
